

Solution

M.A Brothers, Halal Butchers

Tel: 0800 083 5713

Email: info@miltek-uk.co.uk

Company:

MA Brothers is a successful independent Halal butcher and wholesaler, which supplies businesses, restaurants and takeaways across the North East of England.

Problem:

Expensive waste collection and rental costs, from the large amounts of packaging waste being produced at the site. The general waste was being disposed of in an 8 cubic yard skip, which was emptied three times a week. The sites cardboard was stored in two 1100 litre bins.

Solution:

A Mil-tek 305 was installed to compact the large volumes of plastic and cardboard, both materials are now collected and sent for recycling. The large door opening allows for the cardboard boxes to be inserted directly into the baler, so there is no need to flat pack.

Before:

After:

Savings:

The sites waste bill has been cut by over 50%. By segregating and baling the sites recyclable material they have been able to remove both the 1100 litre bins. The skip has been downsized and the expensive collections have been reduced to once a week.

Additional Benefits:

- Improved house keeping
- Staff time saved by disposing of waste close to source
- No more labour intensive folding and flattening of boxes
- Space savings from the removal and down size of bins and skips
- Continued training, support
