

CAN CRUSHER

MODEL 101

- Tins, Cans and Drums up to 7.5 Gallon
- Hazardous and Non-Hazardous
- Up to 90% Compaction
- Small Footprint
- Use Inside or Outside

ENVIRONMENTAL CONCERN. COMMON SENSE.

101 CAN CRUSHER

The ideal solution for compacting tins, cans and drums reducing volume by 90%. With no electric parts, the 101 Can Crusher is easy to clean and maintain and it's small footprint means it can be installed in any location.

Many tins and cans contain hazardous waste such as oil or paint, the removal of which can be very expensive.

By reducing the volume you can also reduce the amount of hazardous waste containers or lifts required and reduce costs by up to 80%

FOOD / CATERING

Many food products are packaged in metal tins and cans, which once emptied can take up valuable space in dumpsters. Using a 101 Can Crusher to compact the used Cans will reduce volume by 90%. Being air powered, the 101 can be placed in areas where food is prepared as there is no risk of hazardous, time consuming & messy oil spillages.

AUTOMOTIVE/MANUFACTURING

Empty paint and oil cans are full of air and take up unnecessary space in dumpsters. Save time, space and money by using a Mil-tek 101 Can Crusher to reduce the volume by 90%. The 101 can run from an existing air line or a supplied compressor, reducing running costs and improving energy consumption.

HOSPITALS

The air powered 101 Can Crusher is the ideal solution for reducing volume and therefore waste costs within the Hospital environment. With no hydraulics, there is no risk of hazardous oil leaks, so the crusher can be located in Kitchens and/or food preparation areas and can run from an existing air line helping reduce spiralling waste costs.

MODEL	101
CAPACITY	Cans/drums of up to 7.5 gallon
PRESSING CYCLE	10 - 20 sec.
DEGREE OF COMPRESSION	85 - 90%
WORKING PRESSURE	4950 lbs at 116 PSI
DOOR OPENING	Height: 1' 7" Width: 1' 2" Depth: 1' 2"
DIMENSIONS (INCL. LEGS)	
WEIGHT, INCL. LEGS	207 lbs
NOISE LEVEL	<70 dB (A)
APPROVAL	CE and AS/NZ 4024.1

Mil-tek IN THE US

- State-of-the-art balers for every waste situation
